Surplus List

THE following list of plants has all been carefully grown for our retail trade and is in excess of our probable wants for the ensuing season. Nothing in our Nurseries is crowded, for we have plenty of room and believe in giving stock an opportunity to develop.

CERTIFICATE OF INSPECTION.

This is to certify that the stock at the nursery of The Elm City Nursery Co., of New Haven, Conn., has been carefully examined and that it is apparently free from dangerously injurious insects and diseases.

Signed, W. E. BRITTON,
State Entomologist.

September 20, 1904.

HOW TO SHIP. Customers are requested to state the mode of conveyance by which they desire their stock forwarded. When no route is named we forward to the best of our judgment; but in no case do we assume any responsibility after the goods are shipped.

TERMS CASH, on or before delivery to express or railroad agents, unless by other arrangement. **PACKING** charged extra, but only sufficient to cover cost of time and material.

We would like a copy of both your trade and retail catalogues.

We issue a most complete retail catalogue, from which a liberal discount will be made from single rate prices to the trade.

Country Life in America

FERN-LEAVED STAGHORN SUMACH.

Fern-Leaf Sumach. (*Rhus Typhina* Var. *Laciniata*.)

This remarkable variety of our native stag-horn sumach has the same rapid robust growth of the common form, producing the same showy cones of bright red fruit, but, as the illustrations will show, the leaves are so beautifully formed that they rival the most delicate fern in their intricacy. For massing with other effective foliage shrubs the effect is very striking. It can also be cut to the ground each season if desired and a mass of the most beautiful foliage will result. This shrub will thrive on the poorest of soils with a surprising luxuriance. We believe this is the first time this splendid new shrub has been offered at a low trade price. Nurserymen can well afford to stock up with it. Prices, see *Rhus*, under Deciduous Shrubs and Vines.

Japan Holly. (*Ilex Crenata*.)

The demand for this very beautiful evergreen shrub is sure to increase rapidly as its merits become better known.

While it makes a very attractive specimen shrub its special value is for hedge purposes.

We have succeeded in getting up a fine stock of this plant and offer it at a very low price. See Evergreen Trees and Shrubs.

Lilacs.

We offer a fine stock of both the common white and purple lilac, also some of the newer sorts. The latter are grafted on small pieces of privet stock and planted low so they are now practically on their own roots, making them far more desirable than plants propagated by budding, which are not long lived. See Deciduous Shrubs and Vines for prices.
